- After Water Meter and Radio Reader are installed, you **MUST** notify the city to come activate the radio read.
- An 18-22 gauge/3 solid low voltage wire required for the water meter remote pad. The water meter and remote pad are required to be hooked-up for final inspection

## Cost:

Standard (3/4") Water Meter & Radio Read	\$500 (this cost includes second meter/reader)
Special order (1") Water Meter & Radio Read	\$600 (this cost includes second meter/reader)
Deer Valley Addition	\$202

## PSI:

- When installing water heater please be aware the house psi should be between 80-100 PSI. The psi from the water tower is 100.

By signing this request for new water account, you acknowledge your awareness that the City's supplied water is transmitted at between 80 PSI and 100 PSI, depending upon your location. You are responsible for determining the pressure at your locations and for ensuring you install equipment and pipe fixtures capable of handling that pressure, and for ensuring the installation is done correctly using the methods required in the industry. The City of Ely, Iowa, states only that its pressures are within industry standards and makes no representations, expressed or implied, that its water pressures are compatible with your chosen equipment or fittings. It is exclusively your responsibility and that of your contractor to ensure all equipment, fittings, and installation methods are safe to use at the City's water pressure at your location. You hereby waive any and all claims against the City of Ely, Iowa and any of its employees or elected representatives for any and all damage to your residence stemming from any failure of equipment due to pressure from the City's water lines.
